Profile

Computer Science student and Full-Stack Developer specializing in Vue.js/Nuxt.js, Node.js, and AI automation. Experienced in architecting production-ready web applications, automated testing workflows, and RAG pipelines. Recognized as a Super AI Engineer "Innovator" and TPQI Level 3 System Developer. Seeking a Full-Stack Developer internship to build robust, scalable, and intelligent software solutions.

Projects

Demo Log Management System
Docker, Vitest, Nuxt 4, TypeScript

- Architected and developed a containerized log management dashboard utilizing Nuxt 4 and TypeScript for high-performance data rendering.
- Implemented robust automated testing workflows using Vitest, achieving predictable code coverage and ensuring system stability.

SaiJaiPhareab Laundry Service
Nuxt.js, TypeScript, PostgreSQL, Prisma ORM

- Developed a production-ready full-stack web application for automated laundry management, featuring dynamic queue sorting and real-time order tracking.
- Designed and optimized relational database schemas using PostgreSQL and Prisma ORM to handle concurrent user transactions securely.
- Integrated an AI Chatbot with Function Calling capabilities to automate customer service workflows and backend operational triggers.

Certificates

Professional Qualification Certificate 2026
Certified national standard proficiency in digital industry software development and system architecture. (System Developer, Level 3)

Super AI Engineer Development Program 2025
Awarded the "Innovator" title (Season 5) for developing advanced RAG pipelines and enterprise-grade AI automation solutions.
